

X50 Server Installation & Configuration Options

Basic Installation & Configuration

Included with every FaxFinder FFX50 Series bundle, basic installation & configuration provides customers time with a trained FaxFinder technician to get your FFX50 operational. During the basic installation & configuration, the following will be accomplished:

- Import Users via CSV Upload or Active Directory Sync
 - Create Groups
 - Create Inbound Routes for Receiving Faxes via Email
- Connect FFX50 to SMTP Email
- Send Faxes via Email Instruction
- Connect FFX50 to Telco
 - Send/Receive Test Fax
- Two Hour Maximum

Advanced Installation & Configuration

An optional add-on, the advanced installation & configuration provides time with a trained FaxFinder technician to get your FFX50 tailored to your environment. In addition to basic installation & configuration services, the following will be accomplished:

- Hands-on assistance through the requirements & prerequisites
- All basic installation commitments
- Cover Pages Walkthrough—how to change default cover page and access cover page editor
- Advanced inbound fax routing to FTP, 3rd Party Storage, Printers, Network Shares, Sharepoint, Email-enabled distribution groups, etc.
- How to Install and Send Faxes via Printer Driver (on client PC, not FFX50 server)
- Connect MFPs using FaxFinder recommended analog adapter
- Install and connect any add-on modules like software-based MFP connectors, 3rd party connectors, etc.
- Enable SSL certifications for HTTP to HTTPS conversion
- Connect to existing SQL server on network
- Create/import address books
- Four Hour Maximum
